

Terms and Conditions of Supply

If you would like us to submit a quotation the following conditions will be attached to all formal quotations.

Quotation prepared by: Sales Persons Name

This is a quotation on the goods named, subject to the terms and conditions noted below:

- Quoted amounts are for supply only
- Price includes supply of 1 x MODEL XXX Aerofloat unit
- Price also includes 1 x Aerofloat Collection and Pumping Package which includes the following items:
 - The inlet end of the greywater holding tank with all inlet and outlets fitted. This includes a 315mm x 200mm centre T- piece for accessing the tank and screen
 - screening system including removable cover for access
 - level switch compartment fitted with 5 level switches with connectors
 - greywater feed pump and the complete pump pipe assembly including valve, check valve, unions and fittings
 - sufficient pipes and fittings for connection to and from the Aerofloat plant
- Included in the supply of the Aerofloat unit and the collection and pumping package is -
 - Commissioning/testing post installation (installation not included)
 - Training and operations and maintenance checklists
 - 12 month warranty on all parts and labor (Note: either the boat or components need to be returned to slipway for repair or replacement).
 - A technical / process support helpline is available for troubleshooting free of charge 12 hours/day 7 days/week. Process support will also be provided for warranty related issues if necessary at the Marina. However during the warranty period if process support is requested and it is demonstrated not to be a warranty issue then charges will apply.
 - Design input into the sizing of the greywater collection tank as well as screening and pumping systems and controls.
- Price does not include spare parts.
- Price does not include any installation costs or costs associated with electrical supply and wiring, sanitary drainage and the greywater collection system. The Aerofloat unit will be provided on a skid ready for installation except for the alum dosing pump/s, chlorine contact pipework, flocculation pipework and other miscellaneous pieces which will need to be installed under the boat by your installer. The Collection and Pumping Package components will also need to be fitted beneath the boats with access hatches for maintenance purposes. We will liaise with your installer during installation and provide recommendations on the location of the various components, but we do not accept responsibility for, nor will we be liable for the work undertaken by your installer or electrical contractor.
- While we will provide advice and recommendations related to the greywater collection tank and electrical supply, it is the owner's responsibility to seek advice on the adequacy of the houseboat's buoyancy to handle the additional weight of the collection tank/s and the Aerofloat units and on electrical supply issues.
